Series Beep

SURFACE MOUNTED

The Beeps are simple light fittings with an efficient 6 W LED-light source (equivalent to a 50 W halogen bulb). Increased tightness up to IP65 and low-voltage power supply allow their use in highly humid rooms. In other interiors, they can serve as subtle-looking plafonds.

Basic lighting. Works well as lighting for bathrooms, terraces, elevations and hallways, and also in business establishments such as offices, clubs, galleries, and hotels.
