MICADO

CECILIE MANZ

Name	Micado table by Cecilie Manz.
Description	A game using sticks was the inspiration behind Micado and the end result is striking in its simplicity. The refined, three-legged construction is assembled without using screws or hinges.
Construction	Solid wood top and leg in oak.
Finish	Oak lacquer or untreated.
Wood	Oak.
Frame	Wood.
Warranty	Fredericia Furniture A/S guarantees all furniture against manufacturing defects in material and construction for 5 years. Normal wear and tear and damage to covers and surface finishes are not covered by the warranty.

Model

1213 table: Ø: 60 cm, H: 49 cm,
Wt: 3,8 kg, Cbm: 0,03 m³.

OAK SOAP

About Soap treatment is a finish that leaves the surface as raw and natural as possible. The natural oils of the soap gently seal the wood and gives it some stain resistance, however a new soap treatment must be applied from time to time to maintain the appearance. Soaped oak is light when new and darkens over time. Oak has a relatively open surface with a visible grain structure, where beautiful flecking is an effect that can naturally occur in solid oak.

OAK LACQUERED

About European oak. A light lacquer treatment partially fills the grain, so the wood structure can be seen on the surface. Oak has a relatively open surface with a visible grain structure. This light lacquer treatment is gentler than a dense lacquer, consequently scratches will not be easily exposed. The wood itself has a nice tactile feel and the natural ageing over time will be more beautiful. A delicate white pigment is added to the lacquer to maintain the light appearance of the oak. Flecking is a lovely effect that can naturally occur in solid oak.

OAK OILED

About Oil treatment enhances the warm tones of oak. The oil used is a clear, natural oil with beeswax. This seals the surface to make it water and stain resistant, thus minimising any visible marks. The oil is absorbed into the wood and creates a smooth surface with a silky touch. Over time, the oil will dry out and new oil must be applied to avoid a dull surface. Oak has a relatively open surface with a visible grain structure. Beautiful flecking is an effect that can naturally occur in solid oak.

SMOKED OAK, OILED

About European oak. Smoked oak with oil treatment is only used for solid wood. The oak is fumed in special steam that darkens the surface and makes the colour browner. Different parts of the solid oak absorb the fume to different degrees and colour differences will naturally occur. After fuming, the oil treatment further enhances the warm tones of the oak. The oil used is a clear, natural oil with beeswax. This seals the surface to make it water and stain resistant, thus minimising any visible marks. Over time, the oil will dry out and new oil must be applied to avoid a dull surface. Beautiful flecking is an effect that can naturally occur in solid oak.
