Set the
light
bulb free

A mini art instalation

The world moves so fast, so take a break
from gravity and experience something
surreal that appears suspended in time.
FLYTE requires no batteries and powers
light through the air via induction.

GIZMODO

WIRED

A square wooden base with a light-colored wood grain. In the center, there is a clear glass globe containing a warm-toned LED light bulb. The light is on, creating a soft glow. A thin, braided gold-colored cord is attached to the top of the wooden base. The entire object is placed on a white wooden surface with a visible grain pattern.

The art of craft

Designed in Sweden, the FLYTE base is made of sustainable sourced oak, ash and walnut. We want your FLYTE to look good, feel good and last a long time. We use energy efficient LEDs which last up to 50,000 hours. That's 12 hours a day for 11 years!

“

*Levitation still
seems like genuine
magic in the world of
technology and staring
at this thing seemigly
defying gravity is utterly
hypnotic*
