SWAN SOFA™

The Swan Sofa™ was made as a special model for the furnishing of suites, lounges and the panoramic restaurant at the SAS Rotal Hotel (today Radisson Blu Royal Hotel) in 1958. The sofa was in production from 1964 -1974 and was reintroduced in 2000. The characteristic 3-dimensional shape contains no straight lines - it is based on curves like the Egg™ and the Swan™.

REPUBLIC OF **Fritz Hansen**

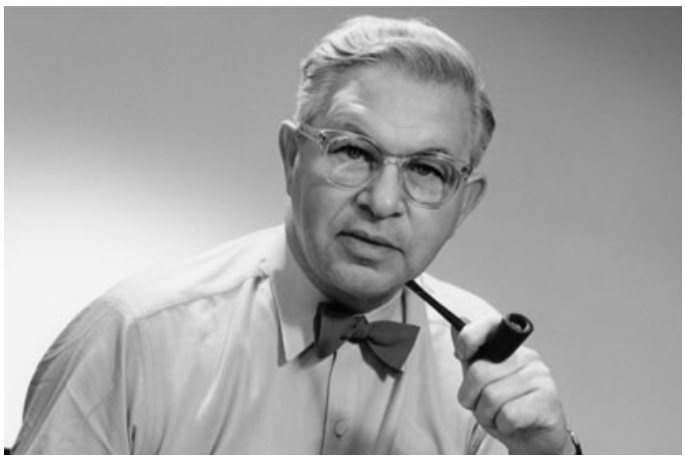
PRODUCT DESCRIPTION

The shell of the Swan Sofa™ is made of polyurethane foam with glass fibre reinforcement. The shell is upholstered with cold cured foam and covered with fabric or leather.

The shaker base is made of moulded aluminium. The two parts of the base are connected with an aluminium rail, which is screwed onto the bottom of the sofa with 2 M6 screws in each shaker base. The feet are provided with synthetic black-grey leg ferrules.

DESIGN

Arne Jacobsen, 1958.



ARNE JACOBSEN 1902-1971

The collaboration between Arne Jacobsen and Fritz Hansen dates back to 1934. It was not until 1952 however that the team got its breakthrough with the Ant™. It was succeeded by Series 7™ in 1955, thereby enabling both Jacobsen and Fritz Hansen to write their names into furniture history.

Arne Jacobsen was incredibly productive, both as an architect and a designer. At the end of the 1950s he designed the SAS Royal Hotel in Copenhagen, also designing the Egg™, the Swan™, the Swan Sofa™ and Series 3300™ for the same project.

Divina Melange 2
100% new wool
24 colours
150 cm wide
Design: Finn Sködt MDD AGI
Introduced: 1999
Revised: 2004

Divina Melange 2

"Melange upholstery in neon colours."

Divina Melange has been extremely well received by the market. Following on from this success, we are now adding additional colourways.

Divina Melange is a textile characterised by its lack of texture and nap and consequently the fabric accentuates the dimensions of the furniture, giving prominence to the colours.

Melange means mixture. The existing six grey and beige colourways are produced by mixing varying proportions of either black or brown wool with white wool. The different colours of wool are mixed before the garment is spun.

The new colourways have come about by dipping the two base colours in bold, virtually luminous pigments. The result is 18 coloured melanges.

No use of brominated flame retardants

Benefits of wool
Wool is a renewable resource
Wool is very comfortable because of its ability to absorb / give off humidity Wool is flame retardant
Wool is biodegradable
Wool is naturally soil resistant
Wool ages with grace

Quality benefits
Very good abrasion
Good lightfastness
Flame retardant

Environmental benefits
Complies with EU Ecolabel
Long life span
No use of AZO dyes, which may split off carcinogenic acrylamines
No use of dyes containing heavy metals
No content of formaldehyde
No use of brominated flame retardants
Biodegradable spinning oil
We adhere to the limits set by the Danish Environmental Protection Agency's "List of Undesirable Substances"
Complies with REACH

Reduced emissions
Greenguard and Greenguard Gold certified
