K Series
A readable structure with elegant lightness:
The K Series by System 180.

Spacious

Some year ago, an order to fit out a conference room faced us with the task of creating a conference table about 5 m in length to accommodate up to 20 people.

The solution presented by the System 180 team is what provided the conceptual design for a range of tables that is scalable through the use of modules, can be customised and is extremely flexible in how and where it is used – the K Series.
Not only does the K Series demonstrably do what it is designed to do, it also impresses with its autonomous, structural design, a point it proved when it won the 2016 iF Design Award. Discover the K Series and plan your own table for conferences, meetings, work, standing and talking, networking or whatever you need to do.

Team-friendly

In a working environment that is becoming ever more mobile, the demands placed on office tables are also changing fast. As well as being suitable for concentrated individual work, they increasingly need to act as the meeting point for working groups and project teams and facilitate people sharing their insights, collaborating in developing new ideas and innovative solutions. And we've designed the K Series especially for just these uses.

Tabletops, which start at 216 cm, can be extended in stages – infinitely in principle. With a depth from 84 cm, standing tables can be set out to be so slim that they can be easily moved about on casters in office spaces, including through doors. And with a possible depth of 162 cm they are also entirely suitable for use as a work bench.

The K48-16 model in the K Series provides six to eight work spaces as a workbench.

The workbench in the K Series is equipped as standard with practical device boxes.
Structural design

The K Series combines classic, functional design with contemporary materials and aesthetics. The load-bearing framework in steel tubing provides a clear view of the furniture's striking structure. There is a second level underneath the table surface, which you can use as a filing space or for storing technical devices.

The device boxes that can be integrated into the table surfaces are under covers that fit neatly flush with the table surface and can be fitted with whatever technical devices you may need.
Optional safety socket strip
(safety plugs, HDMI, USB, USB charger or RJ45 connections, as requested)

Autonomous

We have optimised the K Series for use in larger table solutions, irrespective of whether they are used for standing or sitting. The trussed construction of the furniture frame is available in two heights.

The legs, each of which is made from three individual cylindrical tubes, give a light and elegant look to your table – even where the table spans a large area.

107 cm

73 cm

At a height of 107 cm, the K Series has grown to standing height. Easy-move casters make it child's play to move about.

Pared down

Another highlight of the K Series is its high-quality minimalist tabletops. These pieces contain all the details that show the priorities we have in creating our products. The tabletops, which are coloured right through in black, have edges only 16 mm thick and are smoothed and sealed using our innovative in-house process. This gives the furniture a stylish finish to its surfaces, so that they glide seamlessly over the object's elegant curves. For tabletop finishes, you can choose from 11 solid-colour patterns, two real-wood veneers and high-quality furniture linoleums.

Table work surface made of high-quality furniture linoleum, natural real-wood veneer or easy-care melamine resin.

Support plate in 16-mm MDF, solid-coloured in black, thermally smoothed and sealed.

Underside similar to top surface (where a linoleum surface is being used, a technically appropriate counterpart will be processed).
"Smoky grey" linoleum surface finish

Individual

In the K Series we have developed a modular building-block-based system that allows you to customise your table to your individual needs. First decide on a frame at sitting or standing height, find the format and colour you want for your tabletops as well as the surface finish in steel or black, then select the equipment you need, such as device boxes, panelling and casters and your made-to-measure table is ready. On the pages to follow you will find an overview of types available in the range along with other useful information. Our advisors and specialist retailers will be happy to provide you with support in your planning.

1. Device box Consisting of a tray for technical equipment, flush-fit covers, elastic cable guides and a hanging trough for technical devices.

2. Tabletop In high quality MDR solid-coloured in black with thermally smoothed edges and a range of different surface finishes.

3. Side panelling Optional visual screening for complex technical installations with a finish in steel or black.

4. Floor inserts For practical storage under the tabletop.

Discuss

With a height of 73 cm, the K Series is ideal for creating large table system for all activities done in sitting position, such as talks, conferences and meetings involving larger groups. The Series' tabletops, which start at 216 cm, can be extended in stages – in principle into infinity. You can choose between a depth of 100 and 120 cm. Device boxes can be integrated into the tables if required.

Depth 100

K21-10 #48065
W/H/D: 216/73/100 cm, 1-piece tabletop, optionally with large device box, optionally with covers

K28-10 #48064
W/H/D: 288/73/100 cm, 2-piece tabletop, optionally with two small device boxes, optionally with covers

K36-10 #48063
W/H/D: 360/73/100 cm, 2-piece tabletop, optionally with two large device boxes, optionally with covers

Depth 120

K21-12 #47586
W/H/D: 216/73/120 cm, 1-piece tabletop, optionally with large device box, optionally with covers

K28-12 #47579
W/H/D: 288/73/120 cm, 2-piece tabletop, optionally with two small device boxes, optionally with covers

K36-12 #47559
W/H/D: 360/73/120 cm, 2-piece tabletop, optionally with two large device boxes, optionally with covers
Working

In a depth of 162 cm, the K Series makes a high-performance workbench. The table surfaces can be used in many ways and can be extended with complete flexibility. Flush-mounted device boxes provide plenty of connections for the modern working environment.
Depth 162

K32-16 #60557
W/H/D: 324/73/162 cm, 4-piece tabletop,
2 large and 2 small device boxes, optionally with covers

K48-16 #60561
W/H/D: 486/73/162 cm, 6-piece tabletop,
4 large and 2 small device boxes, optionally with covers

K64-16 #60573
W/H/D: 648/73/162 cm, 8-piece tabletop,
6 large and 2 small device boxes, optionally with covers

Meet

Meetings are increasingly being held in modern offices in standing position, a posture that relieves strain on the back and helps participants to stay more alert. The K series can provide tables at standing height from a slim 84 cm to a stately 140 cm in depth.

These models are fitted with casters (Ø 75 mm) as standard to underline their capacity to fulfil your mobility needs. Device boxes can be planned into tables with depths of 100 and 140 cm.

Depth 84

KS21-8 #58438
W/H/D: 216/107/84 cm, 1-piece tabletop

KS28-8 #58351
W/H/D: 288/107/84 cm, 2-piece tabletop

KS36-8 #58419
W/H/D: 360/107/84 cm, 2-piece tabletop

Depth 100

KS21-10 #58430
W/H/D: 216/107/100 cm, 1-piece tabletop, optionally with large device box, with optionally sight-proof panels

KS28-10 #58347
W/H/D: 288/107/100 cm, 2-piece tabletop, optionally with two small device boxes, with optionally sight-proof panels
KS36-10 #58414
W/H/D: 360/107/100 cm, 2-piece tabletop, optionally with two large device boxes, with optionally sight-proof panels

Depth 140

KS21-14 #58424
W/H/D: 216/107/140 cm, 1-piece tabletop, optionally with large device box, with optionally sight-proof panels

KS28-14 #58297
W/H/D: 288/107/140 cm, 2-piece tabletop, optionally with two small device boxes, with optionally sight-proof panels

KS36-14 #58404
W/H/D: 360/107/140 cm, 2-piece tabletop, optionally with two large device boxes, with optionally sight-proof panels

Networked

The fittings for technical arrangements in the K Series meet the needs of today's working environments. The device boxes recessed into the furniture units can be fitted out with a customised combination of modules depending on your needs.

IN Start · 4 safety plugs · Power input: GST18; Power output: GST18 · Cable length: 3 m · Plastic housing in black

IN Free · 2 safety plugs · 2 two modules for flexible use (here: 1 Slot USB 3.0, HDMI 2.0 And RJ45 CAT6) · Power input: GST18; Power output: GST18 · Cable length: 3 m · Aluminium panelling

2X ▪ and or ▪▪ | HDMI USB RJ45

IN USB Charge · 2 safety plugs and 1 USB dual charger · 1 module for flexible use (here: RJ45 CAT6) · Power input: GST18; Power output: GST18 · Cable length: 3 m · Aluminium panelling

1X ▪ and or ▪▪ | HDMI USB RJ45

A device box fitted with "IN Free"

Versatile

The K Series offers you almost unlimited choice in how you configure your table. For the frame, choose between a surface finish in stainless steel or black. For tabletop surfaces, you can choose between furniture-quality linoleum, high-quality real-wood veneer and easy-care solid-colour patterns.
STEEL LINE
Brushed stainless steel

BLACK LINE
Stainless steel powder coated in black

Solid-colour patterns
Coated on both sides with a protective coating of melamine resin.

White	Light grey
Khaki	Graphite	Black
Light yellow	Iguana green	Atlantic blue
Night blue	Ruby red	Orchid red

Real-wood veneers (available on request)
Finished on both sides with real-wood veneer and sealed with a protective wood treatment oil. Please note that real-wood veneer is a natural material. The appearance and colour of the veneers may differ. Larger surface areas are produced using several sheets whose colour and appearance may differ from one another. Exposure to light will change the colour of real-wood surfaces.

| Oak | Walnut |

Forbo furniture linoleum
Top surface coated with high-quality furniture linoleum.

| Smoky grey | Ash grey | Carbon grey |

Slight variations in colour are possible for technical reasons. System 180 reserves the right to make technical changes. Our advisors are available to the specialist trade to provide further details on technical specifications.
