

The werner works container range features standing containers with a height of 95 cm, roll containers with a height of 60 cm and depths of 60 cm and 80 cm. The freely-configurable front merges seamlessly with the top panel due to the mitred connection and lends the container its unique style. The metal drawers can be easily pulled out by the protruding sides of the front. The front and top panel are available with both decor, veneer and a matt lacquer finish, and can also be used as a decorative element in the office.
